About Us

TRIMEGA PRIMA TEKNOLOGI

PT Trimega Prima Teknologi established at November 2016, it all started from the actual facts and impacts shown caused by technology movements. As the founder, Elio Sanjana realized all the business sectors can improve and elevate their performance by using technology appliance. As we know, it is correct that most of companies already relying their communications and business process on technology, but not all of them understand it is important to synchronized the technology usage with the business subject, and also with the business activities and flows, otherwise the companies will not be affected by the technology appliance benefit. It is not impossible if the appliance might differ from one and another, because every business industry has their own needs and requirements. However, by giving the right investment in technology sectors, the cost from human errors issue will decrease significantly, the effectiveness of the business process will increase as well, and as the final result, the company can expand their business faster and bigger. One of Trimega Prima Teknologi resolutions is to help companies and factories to find the best products and services from any kind preferred brand and providing the best implementation solution that suits your needs the most

06

Hardware

Trimega Prima Teknologi believes that by using the correct hardware, the operation activities will run efficient and effectively. The major issue appeared when companies using the incorrect hardware, which are not supporting the activities, and the business operation will be interrupted and also bring cost for the companies.

With the passion in this subject, Trimega Prima Teknologi are open for discussion, whether it's for a whole construction or single need from Desktop, PC to Tower Server. Together Trimega Prima Teknologi will help companies to plan it and providing the best options to be considered by the companies. Moreover, Trimega Prima Teknologi are able to give you the rent solution beside the regular purchase. Trimega Prima Teknologi can provide any kind of HARDWARE request from desktop, pc to Tower Server.

Rack, Laptop, Tower Server, Desktop PC, Server, Antivirus, Blade, Router, Switch Hardware, Backup and Data protections, Security and Firewall Management, and also NAS, DAS, SAN STORAGE.

Installation

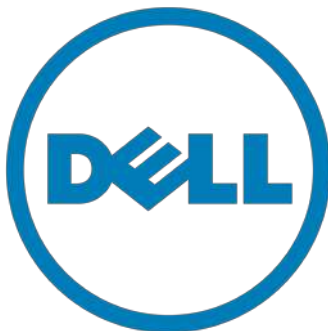

After deciding the right hardware and software that suits companies operations, Trimega Prima Teknologi able to execute the implementation and installation. Another important point that Trimega Prima Teknologi can offer is the after sales service. Trimega Prima Teknologi understand that the technology might need to be maintained once in a while to keep the operation stable.

Bostex, NetApp, RedHat, Brother, CIS (Clinical Information System), and Microsoft.

Software

Software is the other important element to complete the hardware function. They collaborate in terms to create the maximum function to help the companies to grow.

Partnership

Recent Client

As Trimega Prima Teknologi believe that IT taking a major involvement in business progress, we tried to help customer finds the best solutions for their issues. Trimega Prima Teknologi understand that each company has unique pattern and operating strategy that will affect to the IT appliance, that's why understand that the issues must be adjusted according to the business field itself.
